REMARKS.

When Gold Coins have been clipped, or made light by any other process, the following will enable you to ascertain their value [illegible] with American Silver.—

Half Eagle is equal in weight to*	31¼ cents of silver	X Thaler is a shade lighter than	[illegible] cents of [illegible]
Sovereign is equal in weight to	[illegible] cents of silver.	Ten Gilder is equal in weight to	[illegible] cents of silver
Napoleon is a shade lighter than	25 cents of silver	Doubloon is equal in weight to	1[illegible] cents of silver

* An American quarter [illegible] a [illegible] Spanish [illegible]

Those Coins used in Commerce, [illegible] Sovereigns, 20 Franc Pieces, X Thalers, Spanish and Patriot Doubloons and Dollars, &c. will of course fluctuate with the difference between [illegible] supply [illegible] with the [illegible] trade, and what they are actually worth [illegible] from [illegible] to [illegible]

It will be perceived that we have reduced the quotations to the Gold Coins of Central America. Pieces [illegible], reduced [illegible], and consequently of less value, have recently made their appearance. From the close resemblance of the [illegible] persons have mistaken the one for the other, and in order to prevent mistakes in future, we have placed them [illegible]

SILVER COINS OF HAYTI.

The genuine pieces of Hayti are of low silver, and a large number of those in circulation are counterfeit, consequently no value is attached to them, except as curiosities, by antiquarians.

There are pieces among the silver Coins (Bolivian and Peruvian Pieces), which in many cases, fall short in weight or fineness, and are not worth what the full weight and standard pieces are. These we have quoted low, to meet the value of the depreciated pieces. Some doubt has been expressed as to the purity of the late issues from the Belgian Mint. We have, therefore, omitted to note their standard fineness.
